The LG NeON® 2 has seen many improvements, from longer warranties to lower degradation. This panel is ideal for homes seeking a visually pleasing solar panel and for roofs where space is tight or where future system expansions are considered, e.g. to incorporate battery storage.

The LG NeON® 2 panels with their double sided cells and CELLO technology absorb light from the front and the back of the cell. This technology sets a new standard for innovation and was recognised with the 2015 Photovoltaic Innovation Award at the Intersolar Industry Event in Germany. LG also won the 2016 Intersolar award for our new NeON BiFacial range.

**Improved 25 Year Performance Warranty**

The initial degradation of the module has been improved from -3% to -2%, in the 1st year and the annual rate of degradation has fallen from -0.7%/year to -0.33%/year thereafter. This brings an 90.08% warranted output after 25 years, compared to 80.2% for many competing panels.

**Great Visual Appearance**

LG NeON® 2 panels have been designed with appearance in mind. Their black cells, black frames and thinner wire busbars give an aesthetically pleasing uniform black appearance. Your home deserves the LG NeON® 2.

**25 Years Product Warranty (Parts & Labour)**

The LG product warranty is 15 years longer than many competitors standard 10 years. The Warranty is provided by LG Electronics Australia and New Zealand. The warranty includes replacement, labour and transport.

**More Power per Square Metre**

LG NeON® 2’s 355W are a similar physical size to many competing 300W panels. This means with the LG NeON® 2 355W you get 18% more electricity per square metre than a 300W panel. So you can install more kW of solar on your roof with the LG NeON® 2.

**Improved 25 Year Performance Warranty**

The initial degradation of the module has been improved from -3% to -2%, in the 1st year and the annual rate of degradation has fallen from -0.7%/year to -0.33%/year thereafter. This brings an 90.08% warranted output after 25 years, compared to 80.2% for many competing panels.

ABOUT LG SOLAR™

LG Electronics embarked on a solar energy research programme in 1985, using our vast experience in semi-conductors, chemistry and electronics. LG Solar modules are now available in over 50 countries. In 2013, 2015 and 2016 the LG NeON® range won the acclaimed Intersolar Award in Germany, which demonstrates LG Solar's lead in innovation and commitment to the renewable energy industry. Additionally, LG Solar™ won the Australian Top Brand award in 2016, 2017, 2018 and 2019.

With over 200 lesser known brand panels selling in Australia, LG Solar panels offer a peace of mind solution, as they are backed by an established global brand.

KEY FEATURES

<table>
<thead>
<tr>
<th>Feature</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Proven Field Performance</td>
<td>LG has been involved in a number of comparison tests of the LG panels against many other brand panels. LG NeON® 2 models are consistently among the best performing in these tests.</td>
</tr>
<tr>
<td>Corrosion Resistance Certification</td>
<td>LG NeON® 2 panels can be installed confidently right up to the coastline as the LG warranty will guarantee these type of installations.</td>
</tr>
<tr>
<td>Extensive Testing Programme</td>
<td>LG solar panels are tested up to 2 times the International Standards at our in-house testing laboratories, ensuring a very robust and longer lasting solar module.</td>
</tr>
<tr>
<td>High Wind Load Resistance</td>
<td>LG panels have a strong double walled frame. When it comes to wind forces (rear load) our panel under test withstood a wind load of 4000 Pascals.</td>
</tr>
<tr>
<td>Positive Tolerance (0/+3%)</td>
<td>If you buy a 355 Watt panel then the flash test of this panel will show somewhere between 355W and 365W. Some competitor panels have -/+ tolerance, so you could get a flash test result below the rated Watt, meaning you pay for Watts you never get.</td>
</tr>
<tr>
<td>Improved High Temperature Performance</td>
<td>Solar panels slowly lose ability to generate power as they get hotter. LG NeON® 2, has an improved temperature co-efficient to standard modules, which means in hot weather LG NeON® 2 panels will deliver higher output.</td>
</tr>
<tr>
<td>Enhanced low light performance</td>
<td>LG NeON® 2 panels will give better performance under low light, such as early morning or late afternoon compared to many competing panels.</td>
</tr>
<tr>
<td>Automated Production in South Korea</td>
<td>All LG solar panels sold in Australia and New Zealand are manufactured in a custom designed and fully automated production line by LG in Gumi, South Korea ensuring extremely low tolerances. This means great quality and build consistency between panels.</td>
</tr>
</tbody>
</table>

Low LID

The N-type doping of the NeON® cells results in extremely low Light Induced Degradation (LID) when compared with the standard P-type cells. This means more electricity generation over the life of the panel, as the panel degrades less.

Low LID

The N-type doping of the NeON® cells results in extremely low Light Induced Degradation (LID) when compared with the standard P-type cells. This means more electricity generation over the life of the panel, as the panel degrades less.

Low LID

The N-type doping of the NeON® cells results in extremely low Light Induced Degradation (LID) when compared with the standard P-type cells. This means more electricity generation over the life of the panel, as the panel degrades less.
LG NeON® 2 – ENHANCED. MORE EFFICIENT. ADVANCED.

LG NeON® 2 solar panels now offer even more output. Featuring a classy design and with a total of 60 cells, it can withstand under test a static front panel load of 5400 pascals and rear wind load of 4000 pascals. LG has lengthened its product warranty from 10 to 25 years and has improved its linear performance guarantee to 90.08% of nominal output after 25 years. The LG NeON® 2 is an excellent choice for high performing long lasting solar systems.

LOCAL WARRANTY, GLOBAL STRENGTH

LG Solar™ is part of LG Electronics Inc., a global and financially strong company, with over 50 years of experience in technology. Good to know: LG Electronics Australia Pty Ltd is the warrantor in Australia and NZ for your solar modules. So LG support, via offices in every Australian mainland state and NZ and through our 70 strong, Australia wide dealer network, is only a phone call away.

HIGHER OUTPUT, HIGHER YIELD

The NeON® Cell produces energy from both the front and the back of the cell. This innovative approach allows the absorption of light from the back of the cell which raises the panel’s efficiency and power output. Standard panels only absorb light from the front.

EXCELLENT QUALITY, THOROUGLY TESTED

You can rely on LG. We test our products with at least double the intensity specified in the IEC standard. (International Quality Solar Standard).

POWERFUL DESIGN, GUARANTEED ROBUST

With reinforced frame design, the LG NeON® 2 can under test withstand a front load of 5400 Pa which is the equivalent of 943 kg over the size of the panel. The rear load/wind load of the panel under test is 4000 Pa.

LG offers a 15 year longer product warranty for parts and labour than many competitors 10 years to an impressive 25 years.
**Mechanical Properties**

- **Cells**: 6 x 10
- **Cell Vendor**: LG
- **Cell Type**: Monocrystalline / N-type
- **Cell Dimensions**: 161.7 x 161.7 mm
- **# of Busbar**: 12 (Multi Wire Busbar)
- **Dimensions (L x W x H)**: 1686 x 1016 x 40 mm
- **Front Load (test)**: 5400 Pa
- **Rear Load (test)**: 4000 Pa
- **Weight**: 17.1 kg
- **Connector Type**: Genuine MC4, P6B (Male: PV-KST4) (Female: PV-KBT4)
- **Junction Box**: IP68 with 3 bypass diodes
- **Length of Cables**: 2 x 1000 mm
- **Front cover**: High transmission tempered glass
- **Frame**: Anodised aluminum with protective matt black coating

**Certifications and Warranty**

**Certifications**
- ISO 9001, ISO 14001, ISO 50001
- IEC 61215-1/-1/-1-2:2016, IEC 61730-1/-2:2016, UL1703
- OHSA 18001

**Module Fire Performance**
- Type 1 (UL 1703)
- Class C (UL 790, UL/ORD C 1703)

**Product Warranty**
- 25 Years
- Output Warranty of Pmax (Measurement Tolerance ± 3%)
- Linear Warranty

1) 1st year 98%, 2) After 1st year 0.33% annual degradation, 3) 90.08% for 25 years.
