

Choose a LG partner for peace of mind long term support

The up and down of the solar industry is being reflected by this list of the more than 750 solar companies which are listed on the ASIC website since 2011 as being closed, in liquidation, administrators appointed or proposed de-registration. Please note company situations can change without notice. This list is not seen as complete and correct in all aspects as ASIC registration details could have been changed. Therefore please make your own enquiries regarding specific companies and do not rely on this list alone.

Buying from one of the over 80 members of the LG Partner Network means you are dealing with a vetted, full quality focused LG Partner. Only a few solar companies gain this trust to manage our product and sell under our brand.

In the unlikely case one of our Partners decides to retire and leave the industry, LG Electronics solar division will work hard to appoint a new partner for your region, so that you the end customer is not without long term support.

With over 50 applications to join the Partner Network over the past 12 month, we are confident we will find a quality focused partner to back the 25 warranty for decades to come.

Kind regards

Markus Lambert, General Manager, LG Solar - Eastern Creek , NSW 2766
